

 **beans**

  Thank you for coming to my party!

sow in spring or summer

Place the beans in between the 2 cotton wool layers and keep wet. Keep an eye on the beans to watch their progress until they germinate. Plant into soil when they start to grow (this is to learn how seeds grow).

 germinates in 10 - 14 days  harvest in 65 - 85 days  plant in full sun

Plant in soil to watch the plant's progress. Support plants when they get big and harvest regularly to promote new growth.
